## ABOUT ME

Brazilian, 30 years-old, living by learning something new everyday. I'm looking forward to working with innovative and creative people who are willing to make a difference. I have a deep interest in science and technology and I believe that they are the right tools for making people's lives better. For this reason, I decided to study and work for the IT industry, to fully understand how businesses and individuals can go beyond by working side-by-side and, ultimately, build a brighter future.
